Subject: Rookery South RRF - the Health Impact Assessment consultation<=:p>

It was mentioned during the HIA meetings that there were a number of consultees involved with this assessment.

Please provide a list of other consultees for this process.

If the extent of this 'consulting' was limited to the few souls who attended the two feeble meetings put on by ERM then the whole process is clearly an even greater sham than it appeared on the day I attended.

I would like to be able to contact any other consultees to compare notes before preparing our response to the 'process' and the HIA itself."
